

SKILLS & TOOLS

- | | | | |
|-----------------|--------------|------------------------|------------------|
| • C++ | • Java | • React | • Jira |
| • C# | • JavaScript | • Angular | • Sourcetree |
| • HTML | • TypeScript | • Express.js | • REST APIs |
| • CSS | • ADO.NET | • Node.js | • Mongoose |
| • Mongoose ODM | • ASP.NET | • MongoDB | • Ubuntu |
| • IntelliJ IDEA | • GitHub | • MySQL | • Linux |
| • Visual Studio | • Git | • Visual Studio Code | • Spring Boot |
| • .NET Core | • SSMS | • Database Programming | • Android Studio |
| • OOP | • Kotlin | • Jetpack Compose | • Procreate |

PROJECTS

Personal Portfolio

[View GitHub Repo](#)

Developed a portfolio demo using *HTML*, *CSS*, *JavaScript*, *TypeScript*, and *Angular* to demonstrate my problem-solving, idea-generation skills, and understanding of website development.

Bookstore

[View GitHub Repo](#)

Developed a web project using *HTML*, *CSS*, *JavaScript*, *React*, *backend CRUD operations*, *routing*, *MongoDB* and handled *CORS policies* as I gained a holistic understanding of web development.

Employee Management

[View GitHub Repo](#)

Developed an employee management website as a practical application of *HTML*, *CSS*, *JavaScript*, *TypeScript*, *Angular*, and *MongoDB* to hone my skill enhancement and hands-on experience in web development.

Retro Snake Game

[View GitHub Repo](#)

Developed a retro snake game using *HTML*, *CSS*, and *JavaScript* to gain hands-on understanding and experience of fundamental game development.

Pacman

[View GitHub Repo](#)

Developed a clone Pacman game, following my previous project on a retro snake game, to deepen my understanding of *HTML*, *CSS*, and *JavaScript*.

Tetris

[View GitHub Repo](#)

Developed a clone Tetris game with *music* and *sound effects* using *C++*, *OOP principles*, and the *raylib* library to indicate my growing proficiency in these areas. This was my first time using *raylib*.

Text-based RPG Adventure Game

[View GitHub Repo](#)

Developed a video game mainly using *C++* and *OOP principles* to have the inception of a solo developer and so on. This was one of the most complicated projects I ever had, but I learned a lot from it.

EDUCATION

New Brunswick Community College | Moncton, New Brunswick, Canada

Sep 2022 – June 2025

Diploma Information Technology: Gaming Experience Development

- Complete various courses in multiple different Object-Oriented programming languages, such as C++, C#, Java.
- Assembled well-developed websites using different web development frameworks like ASP.NET, React, Angular.
- Became competent in database-related tools and programming, such as SQL and SQL Server Management Studio.
- Collaborated among classmates to complete numerous projects and coursework.
